Founded in 2004 and headquartered in Norcross, Georgia, Exalt Integrated Technologies, LLC (Exalt IT) is a certified SBA Small Disadvantaged Business, and Service-Disabled Veteran-Owned Small Business (SDVOSB) that provides IT Security, Application Development, Mobile Products/Solutions, Infrastructure Solutions and Support Staffing to government agencies.

We have enduring relationships with some of the most data-sensitive clients in the world including the United States Department of Agriculture (9 projects), the Department of Homeland Security (3 projects), and the United States Army (4 projects).

Exalt IT is a small business which increased its revenues 250% from 2007-2012. Our Secret Facility Clearance, successful Defense Contract Audit Agency (DCAA) audit, and CMMI Level-2 accreditation are evidence of our stability. Our listing as #24 on the list of Atlanta's Best Places to work for 2013 is a testament to our ability to recruit and retain the best talent in the industry.

Our commitment to traditional values and personalized services has earned us a loyal and growing list of clients such as the USDA, US Air Force, US Army, Department of the Treasury, and the Department of Homeland Security. In addition to our GSA Contracting vehicles, Exalt IT is a current Prime contractor holder of GSA 8(a) STARS II (GS-06F-0949Z), GSA Schedule 70 (GS-35F-0437V), and Federal Aviation Administration (FAA) Accelerated & Simplified Tasks (eFAST) Program—Blanket Purchase Agreement (BPA), Contract #DTFAWA13A-00213.

**Our Work
with the
Military**

Few firms can offer the expertise that Exalt IT presents as a Service Disabled Veteran Owned Business (SDVOB). At Exalt IT, being a “veteran” is much more than a designation. We hire veterans internally and place them on projects. Being selected as the U.S. Small Business Administration (SBA) Georgia 2013 Veteran Small Business Champion of the Year and receiving a 2013 Employer Support of the Guard and Reserve (ESGR) Patriot Award—Georgia National Guard, show our commitment to our mission of mentoring and hiring veterans.

Exalt IT can help military organizations meet their IT service and mobile product needs including:

- Finding, developing and integrating highly secure, cost-effective and efficient mobile solutions.
- Recycling end-of-life wireless devices.
- Performing security audits, assessments and conducting IV&V.
- Supplying hardware and software and assisting with the purchase, licensing and deployment of technologies.
- Providing certified and highly-experienced developers, analysts, and regulatory standards experts to assess, design, integrate and implement enterprise applications.

EXALT INTEGRATED TECHNOLOGIES, LLC

STAFFING SERVICES:

- Contract Services
- Contract-to-Hire Services
- Direct Hire Services
- Managed Service Provider (MSP)

STAFFING CLIENTS:

- United States Army Legal Services Agency – Office of the Judge Advocate General (OTJAG)
- United States Dept. of Agriculture, Office of the Chief Information Officer (OCIO)
- U.S. Dept. of Agriculture (USDA), Described and Captioned Media Program (DCMP), Forest Service.

Talent Recruitment

Businesses face many challenges in hiring and maintaining a talented workforce. Many companies find it challenging to respond to constantly changing technology needs and initiatives using only internal staff.

Whether you are looking for an individual with in-demand certification requirements or an entire project team with security clearances, Exalt IT can provide reliable team members so you can avoid the expense, delay or inconvenience of lengthy recruiting and assessment processes. We provide:

- **Contract Services** for companies that experience frequent fluctuation resource demand.
- **Contract-to-Hire** Services for companies that intend to hire the Exalt IT consultant at some point in the future.
- **Direct Hire Services** to secure uniquely-qualified and reliable team members so companies can avoid the expense, delay or inconvenience of lengthy recruiting and assessment processes.
- **Managed Service Provider (MSP)** replaces difficult and time-consuming coordination between hiring managers and human resources and the unstructured pay and bill rates that impact a company's ability to have an efficient, cost-effective workforce management process.

Mobile Services

The Mobile (Bring Your Own Device, BYOD) technology revolution can be confusing to IT organizations across all levels of government and in the corporate sector. Our lifestyles and complex work environments mandate that we are always connected. The inability to seamlessly integrate smart phones with the corporate network causes users to be less productive and more frustrated in the workplace. IT Managers, Security and Networking professionals need to manage bandwidth and security policies while allowing users to stay connected to mission-critical systems and to their workplace.

Many organizations are racing to keep abreast of the technology and the policies needed to support the new way of doing business. Users need to leverage the technologies available and increase productivity while keeping the channel of communication open with their customers at all times. This all must be done in a secure manner and in line with their organizations policies. Exalt IT experts are experienced with the dynamic Mobile and Smart device industry and can provide you with solutions that are cost-effective, high quality, and can be customized to fit your needs. Our team offers mobile device solutions for all major platforms including: iOS, Android, Blackberry and Windows.

Enterprise Security Solutions

Information Security is paramount to protecting the confidentiality, integrity and availability of information.

Exalt IT has security expertise in all security disciplines and uses the methodologies outlined in the National Institutes of Standards and Technology (NIST) to frame and conduct all security activities. Exalt IT has vast experience audit, assessment and independent verification and validation (IV&V).

Our security team members have over 20 years of security expertise from Policy and Procedures to technical assessment and implementation. Exalt IT personnel have been preparing Certification and Accreditation (C&A) packages and providing Security consulting since 1990.

Regardless of the methodology needed for an assessment, such as ISO, COBIT, or NIST, we can provide engagement expertise using certified and credentialed experts. Exalt IT has worked with many federal agencies and commercial companies to ensure that their security goals are being met. Whether it is requirements definition, installation, product configuration and/or enterprise deployment of security technologies, Exalt IT has the right personnel at an acceptable price point to strengthen the security of your business.

Exalt IT can assist with the purchase, licensing and deployment of technologies such as Firewalls, Switches/Routers, Unified Threat Management Devices (UTM), Data Loss Prevention (DLP), Content Accelerators, and Web Content Filtering.

**EXALT INTEGRATED
TECHNOLOGIES, LLC**

Infrastructure Solutions

Today's sharpest competitive edges and highest productivity hurdles are found in organizations' technology infrastructure. Behind any great business there is technology that helps facilitate the business goals. Exalt IT creates secure, scalable and flexible infrastructure solutions for small, medium and large-scale organizations. Exalt IT strategically aligns technologies to your business needs to ensure that your infrastructure works for you—and not the other way around.

IT infrastructure has become so much more than just servers, routers and switches. You need a company that understands how all the different technologies from the point of presence provider to the desktop are going to affect you. Exalt IT provides technology certified and highly-experienced consultants that can help ensure that your requirements are precisely defined, correct technology is used and that solutions are scalable to fit your current and anticipated needs.

Whether it is requirements definition, product selection, installation, configuration or assessment, Exalt IT has the right personnel at an affordable price point to strengthen the robustness of your business. Exalt IT provides “one-stop service” for all your infrastructure needs. Not only can we provide the personnel but we can also assist with the hardware and software selection process and extend competitive pricing which enables you to focus on your business and not your IT.

Exalt IT provides solutions for:

- Firewalls,
- Switches/Routers,
- Unified Threat Management Devices (UTM), Data Loss Prevention (DLP),
- Content Accelerators, Web Content Filtering.
- Virtualization,
- Telephony/VOIP,
- Storage/Backup
